

pdActive is a leading provider of AI Identity solutions for enterprise, retail and government customers. The pdActive platform transforms a camera into a business intelligence machine that delivers ROI at a shareholder value scale. pdActive powers customer solutions ranging from asset protection, staff optimization, marketing analytics, large-scale customer identity, and compliance.

pdActive Identity is a multi-level analytics platform powered by deep learning, AI big data and machine learning to identify people, characteristics, objects, actions/behaviors and patterns in dynamic real-life environments where competing technologies are challenged.

pdActive's patent-pending Anonymized Clustering technology delivers operational intelligence for retail customers to rapidly comply with Covid-19 regulations imposed by local governments and protect patrons and staff.
